

Product Description

The HDMI signal amplifier extender extends 1080P high-definition video up to 60 meters by using two unshielded twisted pairs to connect. It not only breaks through the limitations of HDMI cables, but also uses Cat5/6 network cable wire structure. It is more convenient and adaptable, and the cost is also lower. It is a better choice for you to expand HDMI signals. Suitable for all devices with HDMI interface

Features: -

1. Support video input and output: 24/50/60fs/1080p/1080i/720p/576p/576i/480p/480i
2. Support audio formats: DTS-HD/Dolby-trueHD/LPCM7.1/DTS/Dolby-AC3/DSD
3. The transmitter and receiver are used in pairs: no setting is required
4. Signal transmission: Use a cat5e or cat6 cable (recommended) instead of an HDMI cable to connect the RJ45 ports of the receiver and transmitter, which can transmit up to 60 meters;
5. LED display light: When the power supply or extender is working, the relevant LED light will be brightening
6. Use AWG26 specification cables and follow the IEEE-568B standard, and the signal transmission can reach 60 meters;
7. External power supply: DC5V/2A power adapter
8. Quick installation, simple operation, plug and play.
10. Product weight: 425g
11. Packaging size: 210*150*60mm
12. packing list: 1 HDMI signal TX transmitter, 1 HDMI signal RX receiver, 2 DC5V power adapters, 1 manual, 1 color box packaging
